**SLOW LEARNERS AND ADVANCE LEARNERS**

In every academic programme there will be some students who can do really well and learn more with the comprehension capacity, retention ability and hard working practices. On the other side some students may find disadvantage in their learning process due to various personal or systemic reasons. In both these situations the students need special attention and interventions to make their learning activity more enriching and effective. Critical topics are re-explained for better understanding by the students. Appropriate counseling with additional teaching is done which eventually results in students attending the classes regularly.

**Slow learners:**

- The Institute practices a slow learners academic counseling process. During the time of admission Principal interacts with the student on the occasion of welcome speech to assess their need and aspirations.
- The counselors monitor academic performance and interact frequently to understand and orally assist any student with issues that affect their ability to learn or impede their academic success.
- The institute has a system to communicate performance and attendance of students to parents regularly. A set of 20 students are assigned to a faculty as mentor and personal and academic care of the student is taken care of by the corresponding mentor.
- Mentors communicate regularly with the students.
- Care is taken by faculty in monitoring the performance of slow learners.
- Departments conduct remedial classes, provide course notes for students especially the slow learners and those students who are at the verge of dropping out due to arrear subjects.

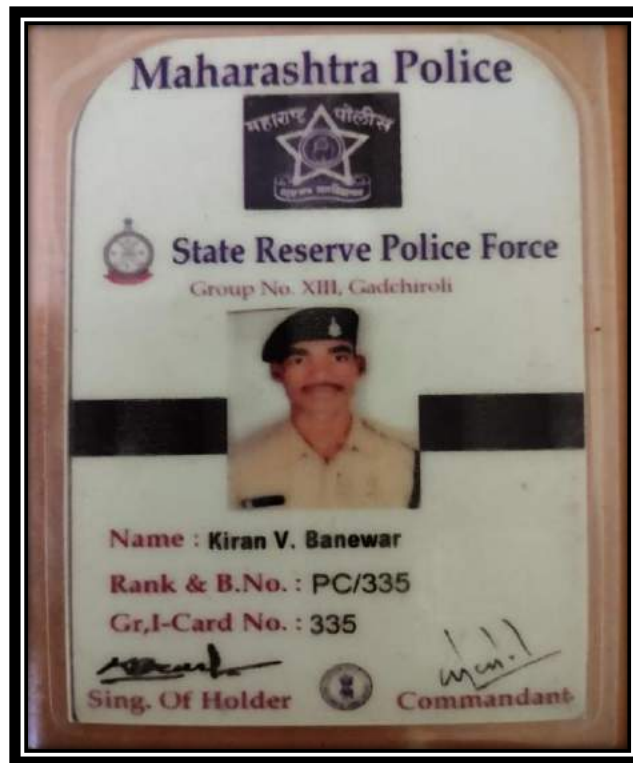

**Advanced learners:**

- High performing students are identified on the basis of internal assessment, university examination, and involvement in classroom.
- Students are encouraged to participate in various sports and cultural activities.
- Advising to participate in group discussions, technical quizzes to develop analytical and problem-solving abilities in them and thereby to improve their presentation skills
- Bright students are motivated and inspired to get university ranks.
- Students are encouraged to take up competitive exams like GATE, GRE, TOEFL, IELTS, CAT, PG CET etc

**Remedial Classes**

In our College Remedial classes are conducted for slow learner. In the regular classes, student fail to understand the subject, such students are admitted to a remedial classes. It focuses on basic concepts, develop better study habits (i.e. preparing notes, etc.) and to develop confidence in the students for respective subject. Remedial classes helps to close the gap between what a student knows and what he is expected to know.

In our college, which is located in a Taluka place, students are coming from different family backgrounds with different living standards of the villages. There are some students with high learning ability who can grasp quite fast and learn better but there are other students who needs frequent guidance and support. Apart from remedial and regular classes, teacher arranged extra classes on request of either students (slow learner or fast learner) or mentor.

**Objectives**

To boost up the confidence of slow learner students and to realize their weakness.

- To enhance the skills in respect of learning process.
- To remove the scare about study.
- To make the equal level of slow learner and advance learner.
- To motivate for an innovative and creative mindset.
- Help to understand paper pattern, question pattern, etc.
- Strategies of Weak Students Identification Following key points are considered to identify the slow learner and fast learner. By asking the oral question in the class room.
- To check their home assignment.
- As per previous university/Board result.
- Remedies For Slow Learner Separate meetings are conducted for them and advance learner students are also welcome in this class.
- Personally help to students for difficult topic.

- Apply the knowledge to develop the sustainable and eco-friendly technology in Industrial Chemistry.
- Acquired a basic knowledge and skillset for becoming employable
- Difference in properties of gases and liquids and its applications in various fields.
- Know the meaning of terms catalyst, catalysis, positive catalysis and negative catalysis, different characteristics of catalytic reactions
- Know the electronic configuration of elements, definition of different types of bonds
- Know about types of bonds, reactivity, different effects and hybridization concept be well acquainted with different functional groups and their reactions in organic Chemistry
- Calculate molecular weight, equivalent weight, normality, and morality.
- Know about the Chemical analysis
- Know about the stereochemistry (chirality, optical activity, enantiomers, etc.) of
- Cyclohexane and other organic compounds
- Know the properties of different bio molecules.
- Identify the molecularity of chemical reactions and experimentally determine the order of the reaction.

## Computer Science:

Students get knowledge and training of technical subjects so that

they will be technical professional by learning C programming, Relational Database Management, Data Structure, Software Engineering, Graphics, Java, PHP, Networking, Theoretical Computer Science, System Programming.

- Communicate scientific information in a clear and concise manner both orally and in writing..
- Have developed their critical reasoning, logic judgment and communication skills.
- To make them employable according to current demand of IT Industry and responsible citizen.
- Students will understand algorithms and flowchart for solving problems using computers.
